# Medical Coding & Billing

Medical Coding & Billing

Medical coding is a process of allotting proper, standardized codes to medical diagnosis and procedures. A medical coding specialist can ensure suitable financial repayment for medical institutions and health care providers for their expenses. The process of medical coding was implemented in order to make a precise and timely financial repayment from government agencies and insurance companies.

Medical billing is the process of submitting and following up on claims to insurance companies in order to receive payment for services rendered by a healthcare provider

We realize the complexity existing in the field of medical coding & billing. With our experienced specialists and support staff, we offer full range of medical coding & billing services such as patient enrollment, scheduling, insurance verification, insurance authorizations, referrals, scheduling and re-scheduling, coding, billing and reconciling of accounts, collections and AR collection.

They are well versed in medical billing processes, legal issues like patient confidentiality, bill collection procedures, and more.

It's our business to understand, and to deliver that business wisdom to you in a way that matches the needs of your personal and business.

NDC-BPO is a financial management company offering you comprehensive advice in all areas of your financial life.

Whether you're in need of personal financial planning, or looking for the right combination of benefits to offer your employees, our professionals work with you to develop the financial plans and strategies to meet your short-term and long-term objectives.

How do we do it?

Using our resources we are able to bring highly qualified individuals and the best talent in the business. Our service is very much solution oriented and our intent is to provide you with the solution that you require. We can create a system, which can take care of any specific need that you may have in your billing cycle or we can provide a full cycle billing solution.

It includes some typical tasks for the Medical Billing/Coding:

1. Registering of patient information.
2. Performing insurance verification, pre-authorization and referral tasks.
3. Preparing and posting transactions on day sheets, charge tickets and patient accounts.
4. Coding and billing insurance claims.
5. Collecting patient payments and performing collection activities.

Our advantages include

• Flexibility in using medical billing software, we can use your current medical billing software or use ours.

• Medical billing can be done remotely, using the software of your choice.

• We can also help you with our web based medical billing software with Hospital Management software.

• We provide daily, weekly and monthly reports.

Our medical managed process outsourcing transcription service is available to physician's groups, individual doctors, as well as for units functioning at hospitals and clinics.
